About Me

I've always had a strong drive for scientific subjects and I'm currently studying informatics at the Università Italiana della Svizzera (U.S.I).

I chose informatics as my future career mostly because I yearn the challenge of a difficult problem and I've always been passionate about tech; here there is no shortage of both.

Despite not certainly being the athletic type (and that's quite the understatement) I enjoy outside activities and particularly I'm always up for a day on the slopes but if it's a rainy day give me pad and console; I'll know what to do.

I proud myself as being a good cook but I'm admittedly a most talented eater.

Skillset

Photography I would describe myself as a low intermediate level Macro photographer. I know how to apply most of the basic techniques and I'm adequately competent in image editing with softwares such as Adobe Photoshop or Lightroom that I can employ for basic designs .

Informatics I can perform well on both macOS and Windows: I'm able to develop basic programs to solve math related problems in Scilab or simple visual applications in Racket.

Group work In the past I've collaborated with eminent authorities in the field on a group project about the "decline of women in informatics" with excellent results. I consider my ability to interact and work with other people one of my strong suits

Education

| | |
|-------------|--------------------------------------------------------|
| Since 2018: | USI, Switzerland Student in informatics |
| 2014 | Avogadro, Roma High school diploma |
| 2009 | Esopo, Roma Middle school diploma |
| 2006 | XX Settembre, Roma Elementary school diploma |
